

FERRARI 250GT LWB

This is a curbside kit, so most of the assembly is straightforward. A few notes however:

1. Remove the baseplate and remove the firewall and the package shelf, which slides forward .
2. A third windscreen wiper (the smaller one) is provided. It is located in the roof on the driver's side. Carefully change the angle of the arm so that the blade is parallel with the top of the windscreen. If not using this wiper, fill the pilot hole in the roof.
3. The large clear discs are headlamp covers.
4. The angle tailpipe faces to the outside of the body.
5. The interior kick panels are right and left handed. These are the pieces with the rectangular openings in the centers. They fit under the dashboard forward of the door panels.
6. It is easiest to install the door panel hardware before fastening the door panel to the inside of the body. The door handle goes into the hole farthest forward.
7. Make sure the seats are not installed too far rearward or they will interfere with the fit of the package shelf when installing the baseplate. I recommend using epoxy for the seats so you have time for adjustment.
8. The bit that looks like a marker light is the trunk release. It mounts below the trunk lid. A pilot hole is provided.
9. The pedals are located under the ledge on the firewall's left side.
10. Brake drums and backing plates are provided for use with after market P/E wire wheels.
11. Decals are forthcoming from V-R-M which will include stripes, roundels, TDF placards, instruments, emblems, etc

Any questions or comments, contact Harold Bradford at historicroacingminiatures@comcast.net. Or call 301-604-8591.

PARTS LIST

Body	Window Cranks (2)	Two Piece Drum Brakes (4)
Baseplate	Door Pulls (2)	Tires (2 Front 2 Rear)
